HugeMed

MS-8 15.6 inches touch screen Image Processor

The all-around upgrade digital video processor for HugeMed™ adopts a new operating system, which functions as a central system to facilitate easier reading and operating in various endoscopy applications. Especially important for occasions where mobility is needed in hospitals.

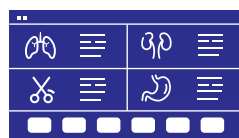

Dual Scopes Display

The dual scopes display interface allows the views of the flexible type scope and blade type scope simultaneously, which enhances the efficiency during the intubation procedures.

Diagnostic Report

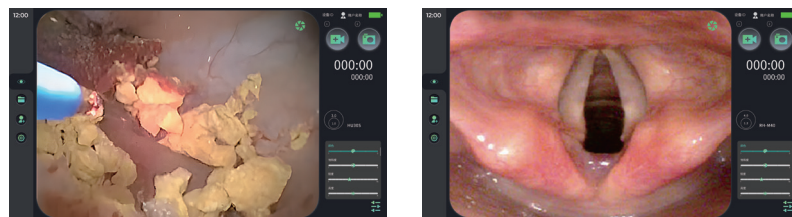

The built-in diagnostic report generation system enables the output of diagnostic reports with one click to increase the flow efficiency of endoscopy.

IT Solution

With DICOM protocol, the MS-8 recorded image and video can be transferred to hospital PACS system. Effectively improving the efficiency of inter-departmental collaboration.

Multipurpose Image processor

Suitable for a variety of clinical application scenario.

Compatibility

- Gold fingers and Type-C connector for scope
- More efficient data transfer capabilities
- Plug and unplug more smoothly
- Effectively reduce plug damage

Gold fingers connector

TYPE-C

More Connection abilities

- USB3.0 for faster data transfer
- Wired or wireless networks ability
- DVI/HDIM/SDI image output ability

USB

HDMI
